

Vikas Singh

Frontend Developer

9315794047 ◇ vikassingh1415@gmail.com ◇ Mirzapur, India ◇ [LinkedIn](#)

SUMMARY

Creative and detail-oriented **Frontend Developer with 4 years of** experience building dynamic, user-centric, and responsive web applications. Skilled in **JavaScript and React**, delivering scalable and maintainable solutions through clean code, cross-browser compatibility, and collaborative development.

EXPERIENCE

Frontend Developer

Aug '22 — Present

Zenatix by Schneider Electric

Gurgaon, India

- Redesign of the Partner Portal with **React and Redux** to simplify integrations while restructuring DM architecture, eliminating frontend effort for configuring new device types
- Collaborated with cross-functional teams to ensure seamless integration of APIs and backend services
- Developed an Integration screen using Ant Design's table, enabling the creation of new device templates for multiple protocols
- Provided critical feedback for the new Partner Portal by identifying corner cases from the old Partner Portal experience, contributing to a stable and long-term product roadmap.
- Gained hands-on expertise in TypeScript, Shadcn, Zod, delivering high-quality codebases
- Developed and launched essential features for the dashboard and gateway commissioning including device like Smartlink, LoRaWAN, and Modbus TCP, BACnetIP, equipment functionality, enhancing product versatility resulting in a 20% increase in user engagement and conversions.
- Developed and integrated authorization by leveraging user tokens and collaborating with other microservices to ensure secure access control across different site features.
- Implemented security best practices by integrating tools like SBOM, Defect Dojo, and SonarQube to identify vulnerabilities, ensure code quality, and enhance application security

Software Engineer

Jan '21 — Jul '22

HCL Tech

Lucknow, India

- Identified and resolved a critical bug in the checkout process, preventing potential lost sales and improving user experience
- Worked along with team member to refactor legacy code, reducing the occurrence of bugs by 30%.
- Focused on creating and enhancing form fields to improve user experience and data processing efficiency

SKILLS

Frontend Technologies: JavaScript, ReactJS, TypeScript, HTML5, CSS3, Vite, Tailwind CSS

Libraries & Frameworks: Redux, Ant design, Zod, ShadCN, React Query, Zustand, MSW (Mock Service Worker)

Tools and Platforms: K8 Lens, SonarQube, Jenkins, Git/GitHub, Jira, SBOM

Development Practices: Agile Methodology, Continuous Integration (CI), Continuous Deployment (CD)

Architecture & Design: Microservices Architecture, RESTful API Design, System Scalability

PROJECTS

Partner Portal Dashboard, Zenatix by Schneider Electric

- The Partner Portal (DM Dashboard) is a modern, scalable web application designed for managing deployments, peripheral mappings, and customer-specific configurations. Built with React.js (Vite), TypeScript, Zustand, Shadcn UI, and Tailwind CSS, it ensures a smooth user experience with dynamic forms, hierarchical data selection, and streamlined workflows. The system integrates seamlessly with existing infrastructure, offering secure, flexible, and future-proof architecture for partners.

Experience Kit, Zenatix by Schneider Electric

- The Experience Kit is a lightweight, mobile-friendly web application designed to simplify the gateway commissioning process. It provides an intuitive interface for quick setup and ensures seamless deployment and integration.

EDUCATION

Bachelor of Technology, Inderprastha Engineering College (AKTU), Ghaziabad

2016 — 2020

Intermediate, Swami Harsewanand Public School, Varanasi

2014 — 2015

VOLUNTEERING

- Conducted multiple interviews to hire skilled front-end resources, fostering a strong and capable development team.
- Provided comprehensive knowledge transfer (KT) sessions to onboard new team members, ensuring a smooth transition and quick understanding of project workflows and technologies
